

WTSR: Role of Operational Controller

CPD | Level 2

Course provides additional information on the roles and responsibilities of the Operational Controller (OC). It complements and is additional to the SafetyOn/G+ WTSR Core Course.

Course duration	2 hours [Approx]
Sector	Wind (Onshore & Offshore)
Pre-requisites?	SafetyOn/G+ WTSR Core Training
Who aimed at?	Primarily aimed at Operational Controllers (OC) wishing to better understand the role as well as anyone undergoing training to become an OC. Also relevant for anyone with responsibilities for the preparation, implementation or operation of safe systems of work in a wind turbine. Highly relevant for: ■ Authorising Engineers ■ Authorised Technicians ■ Operational Controllers ■ H&S Advisers ■ Asset Managers ■ Responsible Managers ■ Authorisation Officers
Topics covered	Course provides an understanding of the duties of an Operational Controller in relation to the requirements of the implementation and application of WTSR. Sets out the role and responsibilities of an OC to meet the requirements of WTSR Part C and P6. Key topics include: ■ Functions of Operational Control in applying the WTSR ■ Understand the role and responsibilities of an appointed OC ■ Know the training & competence requirements for an OC ■ Three key steps to enable Safety from the System ■ Understand the key steps to enact the Transfer of Control process ■ Understanding of overarching works control processes ■ Managing & communications of Exceptions ■ Dealing Company/Site specific situations
